

Conchitæ valvis æqualibus, æquilateri, quasi plani aurici, et striati, stris tenuioribus: Pectun-
culitæ dicti. Strahl-Müßhlein Stein.
Pectunculites maior striatus imbricibus striarum durè apparentibus cinereis - fasculus matri-
ci marmoreæ eleganter variegatæ, ac pollex inhxrens ex utroque latere representatus.

Pectunculites mediocris cinereus striatus,
et echinatus, sed auribus quasi spoliatus ex utroque
latere representatus.

Idem castanei coloris imbricibus magis sensibilibus ex utroque latere representatus.
